## Past Performance

### US Secret Service Headquarters Office of the Chief Information Security Officer

Rapid Strategy supported the CIO in improving FISMA security scorecards by advising risk mitigation techniques to senior leadership. Performed continuous monitoring and risk scoring by assessing security controls across the environment. Managed the certification and accreditation process by putting together system security packages for Authority to Operate (ATO) for systems across NIPRNet and SIPRNet. Briefed senior management team on vulnerabilities, threats and risk to the agency.

### Army Research Laboratory Computer Network Defense Service Provider (CNDSP)

Rapid Strategy delivered endpoint detection and response advisory and engineering support to over 500 federal agencies across two classified networks and two unclassified networks. Advised agencies on CyberCom Readiness Inspections (CCRIs) and reported findings to CyberCom for FISMA reporting. Perform 24\*7 monitoring across subscribers for cyber incidents.

### Pentagon Force Protection Agency Office of the Chief Information Officer

Rapid Strategy architected, engineered, and administered cybersecurity technologies for the classified and unclassified networks. Ensured that all digital assets were secure with security controls and scanned for vulnerabilities on a consistent basis. Performed cyber incident response on classified and unclassified networks. Conducted interviews for data spillage incidents and created chain of custody for all investigations in the event the incident went to court.

### Marine Corps Installation East G-6 Communications

Rapid Strategy supported cybersecurity operations for classified and unclassified networks by implementing technical controls ensuring that the confidentiality, integrity, and availability of all data is secure. Performed red and blue team assessments on critical infrastructure to identify weaknesses in systems. Documented findings and provide remediation tactics to system owners.
